

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-39. (Cancelled).

40. (New) A method for generating a printable document, the method comprising:
designating a changeable field within a template wherein the changeable field includes a
name;
linking a plurality of data items to the changeable field;
creating a form wherein the form comprises the name of the changeable field paired with
a list of the plurality of data items linked to the changeable field;
selecting a data item from the plurality of data items linked to the changeable field; and
populating the changeable field of the template with the selected data item thereby
generating a document.

41. (New) The method of claim 40, further comprising providing a preview of the
document by populating the changeable field of the template with one of the plurality of data
items linked to the changeable field.

42. (New) The method of claim 41, wherein populating the changeable field of the
template with one of the plurality of data items comprises defining a default selection to populate
the changeable field.

43. (New) The method of claim 42, wherein the default selection is a random
selection from the list.

44. (New) The method of claim 42, wherein the default selection is a first data item
in the list.

45. (New) The method of claim 41, wherein populating the changeable field of the template with one of the plurality of data items comprises iteratively showing the preview with each data item in the list.

46. (New) The method of claim 40, further comprising bundling the template, the plurality of data items, and the form into a file.

47. (New) The method of claim 46, further comprising extracting the template, the plurality of data items, and the form from the file and saving the extracted template, the extracted plurality of data items, and the extracted form in a database.

48. (New) The method of claim 41, further comprising editing the preview.

49. (New) The method of claim 40, further comprising automatically adjusting a size of the selected data item based on a size of the changeable field.

50. (New) A computer program product for generating a printable document, the computer program product comprising:

computer code configured to:

receive a changeable field designated by a user within a template wherein the changeable field includes a name;

link a plurality of data items to the changeable field;

create a form wherein the form comprises the name of the changeable field paired with a list of the plurality of data items linked to the changeable field;

receive a data item selected by the user from the plurality of data items linked to the changeable field; and

populate the changeable field of the template with the selected data item thereby generating a document.

51. (New) The computer program product of claim 50, further comprising computer code configured to provide a preview of the document by populating the changeable field of the template with one of the plurality of data items linked to the changeable field.

52. (New) The computer program product of claim 51, wherein the computer code configured to populate the changeable field of the template with one of the plurality of data items comprises computer code configured to define a default selection to populate the changeable field.

53. (New) The computer program product of claim 52, wherein the default selection is a random selection from the list.

54. (New) The computer program product of claim 52, wherein the default selection is a first data item in the list.

55. (New) The computer program product of claim 51, wherein the computer code configured to populate the changeable field of the template with one of the plurality of data items comprises computer code configured to iteratively show the preview with each data item in the list.

56. (New) The computer program product of claim 50, further comprising computer code configured to bundle the template, the plurality of data items, and the form into a file.

57. (New) The computer program product of claim 56, further comprising computer code configured to extract the template, the plurality of data items, and the form from the file and to save the extracted template, the extracted plurality of data items, and the extracted form in a database.

58. (New) The computer program product of claim 51, further comprising computer code configured to allow the user to edit the preview.

59. (New) The computer program product of claim 50, further comprising computer code configured to automatically adjust a size of the selected data item based on a size of the changeable field.

60. (New) A system for generating a printable document, the system comprising:
computer code configured to:

receive a changeable field designated by a user within a template wherein the changeable field includes a name;
link a plurality of data items to the changeable field;
create a form wherein the form comprises the name of the changeable field paired with a list of the plurality of data items linked to the changeable field;
receive a data item selected by the user from the plurality of data items linked to the changeable field; and
populate the changeable field of the template with the selected data item thereby generating a document;
a memory, the memory configured to hold the computer code; and
a processor, the processor coupled to the memory and configured to execute the computer code.

61. (New) The system of claim 60, wherein the computer code is further configured to provide a preview of the document by populating the changeable field of the template with one of the plurality of data items linked to the changeable field.

62. (New) The system of claim 61, wherein the computer code configured to populate the changeable field of the template with one of the plurality of data items comprises computer code configured to define a default selection to populate the changeable field.

63. (New) The system of claim 62, wherein the default selection is a random selection from the list.

64. (New) The system of claim 62, wherein the default selection is a first data item in the list.

65. (New) The system of claim 61, wherein the computer code configured to populate the changeable field of the template with one of the plurality of data items comprises computer code configured to iteratively show the preview with each data item in the list.

66. (New) The system of claim 60, wherein the computer code is further configured to bundle the template, the plurality of data items, and the form into a file.

67. (New) The system of claim 66, wherein the computer code is further configured to extract the template, the plurality of data items, and the form from the file and to save the extracted template, the extracted plurality of data items, and the extracted form in a database.

68. (New) The system of claim 61, wherein the computer code is further configured to allow the user to edit the preview.

69. (New) The system of claim 60, wherein the computer code is further configured to automatically adjust a size of the selected data item based on a size of the changeable field.
